EXPERIENCE (10 YEARS)

HIGHLEVEL | LEAD ENGINEER

Dec 2025 – Current | Bengaluru, India

- Led the credentials team, extending an existing Canva-style builder with a layer-based error-flagging and locking system for the certificate/badge builder, **reducing failed template issuances by 18%**.
- Built a multi-input (stylus/mouse/touch) signature capture modal, **driving 60% adoption** of hand-drawn signatures over default option and boosting credential authenticity.
- Introduced an **AI chat-based template generator powered by GPT-5 Mini** that turns a few guided prompts into a ready to use template, reducing reliance on constantly refreshing the default template set leading to better and varied designs.
- Shipped a QR code feature for linking certificates to custom URLs, **driving adoption across 200 locations in week one** and boosting credential authenticity.
- Extended certificate/badge download support from PNG-only to include JPG and PDF, giving users **flexibility in download format and shareability**.
- Added expiration support for certificates, badges, and templates, auto-expiring credentials based on a timeframe set at issuance — **one of the most requested features from customers**.
- Shipped a builder feature Epic covering rich text (bold/italic/underline with shortcuts), single-edge resize correction, hover highlight borders like Canva, color gradient support, and direct copy-paste to create text elements to improve builder usability.
- **Found and fixed a cross-location RBAC vulnerability** that allowed users to access another location's data by swapping IDs in requests, resolved at the gateway level by matching the location ID in the request against the one in the token.
- Corrected Pendo analytics inflated numbers by automation-suite usage, adding exclusion rules to **restore accurate usage numbers (From 35K to 31K raw events)** and also added more analytics to get more rich and useful usage data on existing and new features.
- Migrated the build pipeline from Webpack to RSpack and from Yarn to pnpm as a package manager, **bringing build time down from 3 min to less than 2 mins**.
- Resolved several production issues, including missing font support during backend template image generation, thumbnail-generation failures that broke push notification previews, and certificate/badge emails being mixed up on issuance — alongside cleanup of outdated and vulnerable dependencies across frontend and backend, **improving overall stability and reducing customer support tickets**.
- **Tech stack: Module Federated Vue App, NodeJS, NestJS, Canvas, Mongo, GCP, Pendo and Jenkins.**

SIMPL | STAFF SOFTWARE ENGINEER

Sept 2021 – Nov 2025 | Bengaluru, India

- Led the payments team and brought payments success rate from **81% to 87%**.
- Developed a novel method that allows the payment page to detect with **100% accuracy, via the web**, whether the payment app is installed on Android devices using the Payment Request API that caught the attention of **NPCI**.
- Updated tech so as to be one of the first in the country to receive **PCI DSS 4.0 Certification**.
- Built from ground up the Ecomm platform at Simpl with all payment methods.
- Spearheaded cost cutting features in FE to **optimize UI by 35% at 60% lower costs** using CSR as default and making UI simple and understandable.
- Conceptualized and executed multiple A/B experiments and improved the conversion of payments pages by **12%** on all platforms.
- Provided novel solutions for **4 different services (Payments, PI3, Checkout and Anti Fraud)** on wide variety of tech like Svelte, React and Vue.
- Developed a component library package of web components for faster development and standardized UI.
- Created a new Anti Fraud Dashboard to help detect fraud **7% faster**.
- **Tech stack: Svelte, Vite, React, Recoil, Payment Request API, NodeJS, Postgres, Typescript, Docker and AWS.**

KEYVALUE SYSTEMS | SENIOR SOFTWARE ENGINEER

March 2020 – Sept 2021 | Kochi, India

- Came up with a unique solution as an onboarding tool to provide a web based UI using WebRTC, Open CV to capture dental issues hence removing all hardware needs and thus **saving 100% cost on all hardware**.
- Designed and implemented end-to-end solutions for Zenyum Singapore, a Sequoia Capital client.
- Migrated the AngularJS dashboard to React which better suited the needs for the client and made it more performant **(by 65%)** and also making it a one stop solution for all info and services.
- Was part of the Senior team for talent acquisition and training in the organization.
- **Tech stack: Angular, React, Redux, NextJS, PWA, NodeJS, MySQL and WebRTC.**

CABOT | SOFTWARE ENGINEER L2

July 2016 – March 2020 | Kochi, India

- Full-stack developer working on **projects** for offshore clients based on multiple domains like healthcare, tourism, e-commerce and many others.
- Was part of the team for **explorations and proof of concept development** for new clients ranging on multiple tech stacks.
- Analyze, Estimate, Execute and then lead projects and its development to ensure on time delivery and finally monitor and maintain the solution provided and tweak to make changes based on feedback.
- Work on certifications like **HIPAA** and others so that projects of that nature can be executed well within guidelines.
- Training freshers to the tech so as to ensure strong foundation for the future.
- **Tech stack: AngularJS, Angular, React, React-Native, D3, Electron, Ionic, HTML SCSS, Bootstrap**

SKILLS

PROGRAMMING

JavaScript • Typescript • Python • Shell

LIBRARIES/Frameworks

jQuery • Node.js • Angular • Svelte • React • React-Native • Next • HTML • SCSS • D3 • Redux • Recoil • Saga • Vue • Jasmine • Puppeteer • Playwright • Vite • SvelteKit • Express • Webpack

AI & AGENTIC ENGINEERING

Prompt Engineering • LLM Integration • RAG Pipelines • OpenAI API • Claude API • Fine-tuning • Agentic Workflows • MCP (Model Context Protocol) • AI-assisted Code Review • Claude Code • GitHub Copilot

TOOLS/PLATFORMS

Git • MySQL • PostgreSQL • Mongo • GraphQL • AWS • Docker • Cloudfront • S3 • ECS • Growthbook • Sentry • Jenkins • Concourse • Clevertap • Figma • Pendo • Jira • ClickUp

CERTIFICATIONS

ADVANCED AI TRAINED PROFESSIONAL

ANEXAS EUROPE

June 2019 - Aug 2019 | Kochi, India

ACHIEVEMENTS

- Nominated Best Performer at Simpl (2023)
- Winner of Simpl Hackathon 2023
- Best Performer at Cabot (2018, 2019)
- Nominated Best Performer at Cabot (2016)
- Former Member Center for High Performance Computing, FISAT
